Text Scramble Effect Version: V1.0

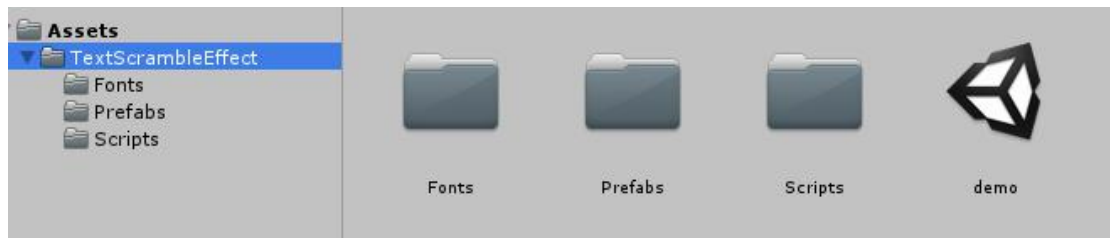

<http://www.maything.com>

Thank you very much for purchasing this package.

This guide will tell you how to use Text Scramble Effect!

## Import Text Scramble Effect Package

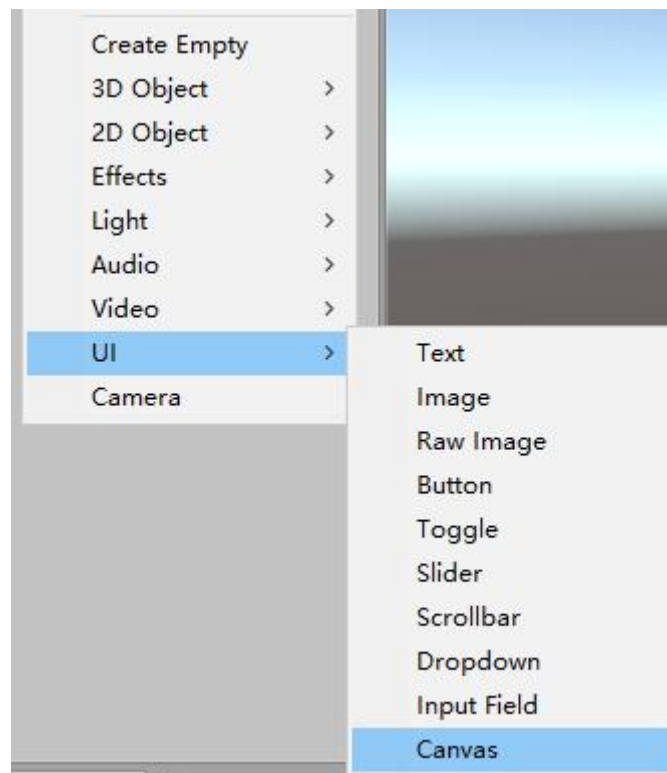

First you need import Text Scramble Effect package for your project! You can see:

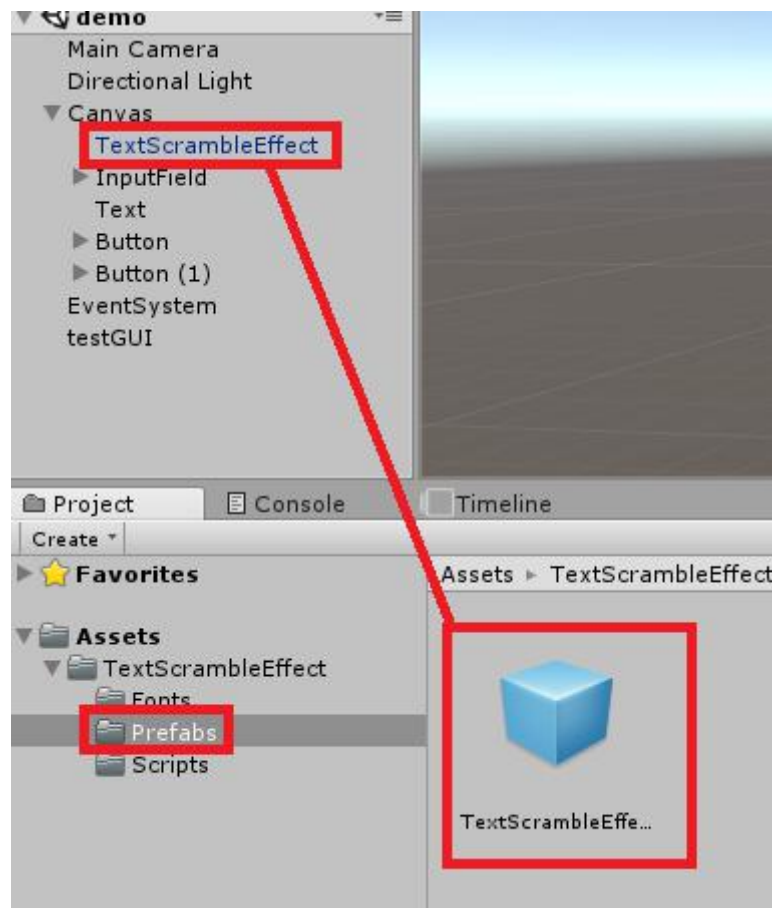

And now you can use Text Scramble Effect!

## How add Text Scramble Effect to Scene?

- You need add UI Canvas on your scene node:

- Drag "TextScrambleEffect" Prefab on your canvas scene node!

- OK, Now click run button to see this effect!

## About Font

You can use lettergothicstd directly.

If you want to use other fonts, you can only use the same width font, all letters must be the same width! In order to achieve the effect.

## More question?
